DISCHARGE SUMMARY

DISCHARGE DATE	8/8/2002
FINAL DIAGNOSIS	Acute Bronchitis
TREATMENT/PROCEDURE	
c. S. Drowsy a. Coughing for i. Wheeze. Pale face ii. Mucous sputum iii. No fever	

SOURCE : Example of observation with 3 phrases
 Hyperthermia 38.3. Abdomen supple in general, without guarding nor splenomegaly, no disorders of gastrointestinal transit, no maelena, no hemorrhage of rectum, no hematemesis, decrease of the VM in bases, productive cough, no pharyngitis and no CM eruption, no purpura, no petechia. CR- diffuse bronchial Sd.

Terms not recognized by the ECMT are:
 - synonym not processed by the ECMT (Italics)
 - Abbreviation (underlined italics)

Negation (Bold)

STEPS OF TEXT PROCESSING

1. OBSERVATION DIVIDED INTO PHRASES, THEN PHRASES DIVIDED INTO SYNTAGMAS

Phrase 1:
 Hyperthermia 38.3.

Phrase 2:
 Abdomen supple in general,
 without defense nor splenomegaly,
 no disorders of gastrointestinal transit,
 no maelena,
 no hemorrhage of rectum,
 no hematemesis,
 decrease of the VM in bases,
 productive cough,
 no pharyngitis
 and no CM eruption,
 no purpura,
 no petechia.

Phrase 3:
 CR- diffuse bronchial Sd.

2. NEGATIONS SOUGHT (syntagmas deleted:
 "without defense nor splenomegaly", "no disorders of gastrointestinal transit", "no maelena", "no hemorrhage of rectum", "no hematemesis", "no pharyngitis", and no CM eruption", "no purpura", "no petechia")
 3. SPELLING AND ABBREVIATION REPLACED
 4. NUMERICAL VALUES REMOVED (39°C)

Phrase 1:
 Hyperthermia.
 Phrase 2:
 Abdomen supple in general,
 decrease of vesicular murmur in bases,
 productive cough.
 Phrase 3:
Chest radiography: diffuse bronchial syndrome.

5. PHRASES RE-CONCATENATED

Phrase 1: Hyperthermia
 Phrase 2: Abdomen supple in general, decrease of vesicular murmur in bases, productive cough.
 Phrase 3: Chest radiography: diffuse bronchial syndrome.

6. RE-CONCATENATED PHRASE SENT SEPARATELY TO THE ECMT

7. OBSERVATION PROCESSED IN URGINDEX AFTER RETRIEVING ECMT STANDARDIZED CODES AND LABELS AND FILTERING SUSPECTED INFECTION CODES

"Observations" table:

SNO / F-03003 / fever; SNO / F-0A440/ hyperthermia; MSH / D005334 / fever; SNO / F-23010 / vesicular murmur;
 SNO / G-A316 / decreased; CIM / R05 / cough; SNO / F-24100 / cough; SNO / F-241C0 / Productive cough;
 DRC/ 12905_CRI / ++++ cough; DRC/758 / cough; CIP / R05 / cough; MSH / D003371 / cough; SNO / T-28000 / Lung, nos; SNO / P5-20000 / Radiography of chest, nos; MSH / D013577 / syndrome; SNO / T-26000 / Bronchus, nos; SNO / G-A321 / Diffuse

DISCLAIMER
DISCLAIMER

Studies have shown the most common causes of death and
morbidity in patients treated for hypertension include heart disease, stroke, and
diabetes. These conditions are associated with increased risk of heart attack and
stroke due to existing associated risk factors.

These risk factors are often present in patients with hypertension and
are often present in patients with other diseases.

Because hypertension is a risk factor for heart disease and stroke, it is
important to control blood pressure. Please ask your physician or pharmacist
about blood pressure control.

PDF

Hypertension increases the risk of heart attack and stroke.
Hypertension is often present in patients with other diseases. Controlling blood pressure is important because it reduces the risk of heart attack and stroke.

The presence of other diseases, such as heart disease, may increase the risk of hypertension. Hypertension may also increase the risk of heart disease. Controlling blood pressure is important because it reduces the risk of heart attack and stroke.

Please see [blood pressure control](#) for more information on how to control blood pressure. Hypertension is usually treated with the same medications used to treat heart disease and stroke.

EVALUATION

DAY/DATE/ HOUR	DX	EVALUATION	SIGNATURE
Friday/May 13 th 2011 08:30 pm	I	S : Patient says that she can breath easier than before. O : Patient can breath without any difficulties. A : Problem has been solved. P : Continue the intervention.	
	II	S : Patient says that she doesn't feel pain any more. O : Pain scale is 4. A : Problem has been solved. P : Continue the intervention.	
	III	S : Patient says that she doesn't get fever any more. O : The body temperature is 37.1° C A : Problem has been solved. P : Continue the intervention.	
Saturday/Ma y 14 th 2011 08:30 pm	I	S : Patient says that she can breath easier than before. O : Patient can breath without any difficulties. A : Problem has been solved. P : Continue the intervention.	
	II	S : Patient says that she doesn't feel pain any more. O : Pain scale is 3. A : Problem has been solved. P : Continue the intervention.	
	III	S : Patient says that she doesn't get fever any more. O : The body temperature is 37° C A : Problem has been solved. P : Continue the intervention.	

The most serious cases can request hospitalization. If you have bronchitis and you are worried about Coronavirus, you can get advice on Coronavirus and bronchitis from the British Lung Foundation. If the symptoms last at least 3 months, it's called chronic bronchitis. Don't care for chronic bronchitis, but some lifestyle changes can help relieve symptoms, such as: eating a regular healthy diet. Moderate physical exercise avoid Smoking There are several drugs to relieve symptoms. Muclet drugs thin the mucus in the lungs, making the cough easier. Gestion of the symptoms at home suffer from acute bronchitis: resting for a long time Drinking many liquids → This helps prevent dehydration. Higher on Tossethe Medicines and Healthcare Products Regulatory Agency (MHRA) recommended that counter-cough drugs do not administer to children aged under 6 years. Children aged between 6 and 12 should only use them on advice of a doctor or a doctor pharmacist. In alternative to drugs for bench cough, try to prepare your mixture of honey and lemon, which can help soothing sore throat and relieve cough. In botanicinibitit bronchitis because it is normally caused by a virus. Antibiotics have no effect on viruses, and prescribing them when they are not necessary, over time, make bacteria more resistant to antibiotic treatment. Higher on the resistance to mediotic antibiotics so generic prescribe antibiotics only if you have a greater risk of developing complications, as pneumonia. Antibiotics may also be recommended for premature children elderly people over age of 80 people with a history of heart, lungs, kidneys or liver diseases people with a weakened immune system, which could be the result of an underlying condition or a side effect of a treatment like steroids with cystic fibrosis. If you prescribe antibiotics for bronchitis, A is likely to be a 5-day cycle of amoxicillin or doxycycline. The side effects of these medications are uncommon, but include feeling sick, being sick and diarrhea. Pneumonia → the most common complication of bronchitis. Occurs when the infection spreads further into the lungs, causing small pockets of air inside the lungs to fill with fluid. About 1 in 20 cases of bronchitis lead to pneumonia. People at an increased risk of developing pneumonia include: elderly people smoking people with other health conditions, such as heart, liver or kidney disease people with a weakened immune system. Mild pneumonia can usually be treated with antibiotics at home. The main symptom of acute bronchitis → a hacking cough, which may bring light to light light mucus, yellow-gray or greenish (phlegm). Other symptoms are similar to those of the common cold or sinusitis, and may include: headache, a buzzing throat or blocked nose and pain? If you have acute bronchitis, the cough may last for several weeks after other symptoms have gone. You may also find that the cough continues makes your chest and stomach muscles more painful. Some people may have shortness of breath breathing wheezing as a result of inflammation. But this → more common with long-term (chronic) bronchitis. Skip to main content The bronchitis → an infection of the main respiratory tract of the lungs (bronchi), causing them become irritated and inflamed. The main airways branch out on both sides of the trachea (trachea). They lead to smaller and smaller airways¹ within the lungs called bronchioles.
